

Reward Uplift Model v1 (Track R — Research-generated IncentiveRewards mock)

Milestone 6 — InComm MyRewards / KSU mHealth Lab

Prepared by: KSU mHealth Research Lab | Date: 2026-10-01

TreatmentSourceBasis = Research-generated IncentiveRewards mock. Milestone 7 must not consume these scores as production lift.

Estimand

$\tau(x) = P(Y=1 \mid T=1, X=x) - P(Y=1 \mid T=0, X=x)$. T is a research-generated IncentiveRewards issuance (Bernoulli among gaps still open at outreach). Y is InComm-sourced closure in (issued_at, issued_at+365]. Assignment is independent of later Closed. Historical closure was not caused by mock T — identified CATE is a pipeline / negative-control result, not partner-facing lift.

Headline identification

CATE identified: True. Headline claim: CATE.

- Identified.
