

Uplift / CATE Performance Summary (Track R — Research-generated IncentiveRewards mock)

Milestone 6 — grouped multi-seed evaluation

Prepared by: KSU mHealth Research Lab | Date: 2026-10-01

TreatmentSourceBasis = Research-generated IncentiveRewards mock. Milestone 7 must not consume these scores as production lift.

Sample

Metric	Value
Rows	11669
Members	6668
Treated rows	5217
Control rows	6452
Treated closure rate	0.3933
Control closure rate	0.3842
ESS ratio	0.9878
CATE identified	Yes
Treatment grain	gap-level

Per-seed holdout

Seed	Ate	Auuc	Placebo Auuc
42	-0.0186	-0.0021	8.531e-05
123	0.0169	0.0133	0.0013
456	0.0088	0.0101	-0.0018
789	0.0303	0.0151	-0.0007712
2026	0.0198	0.0175	0.0028

Care-gap descriptives (Track R mock assignment)

T is Bernoulli among gaps still open at reconstructed outreach. Y is 365-day post-issue InComm closure, not the raw Closed flag. Treated and control should both have outcome variation; T must not equal Y.

Care	N	Treated	Control	Treated	Control	Untreat
------	---	---------	---------	---------	---------	---------

Gap Code		Rows	Rows	Closure Rate	Closure Rate	ed Arm Empty
BH_POST_DISCHARGE_7D	1667	729	938	0.7531	0.7452	No
COPD_SPIROMETRY	1667	762	905	0.6220	0.5934	No
DIAB_A1C_TEST	1667	752	915	0.2021	0.1945	No
DIAB_BLOOD_SUGAR	1667	735	932	0.3333	0.3069	No
DIAB_EYE_EXAM	1667	754	913	0.2812	0.3001	No
DIAB_NEPHROSCREEN	1667	726	941	0.3154	0.2859	No
HTN_CP_FOLLOWUP	1667	759	908	0.2516	0.2599	No

Positivity by stratum

A stratum with no untreated (or treated) arm cannot support a tau estimate; none is reported for it, and the holdout size that would restore identification is listed.

Stratum	Treated Rows	Control Rows	Treated Rate	Control Rate	Status	Holdout N Per Arm For 1pp
family: BH	729	938	0.7531	0.7452	OK	
family: COPD	762	905	0.6220	0.5934	OK	
family: DIAB	2967	3701	0.2824	0.2721	OK	
family: HTN	759	908	0.2516	0.2599	OK	
gap:BH_POST_DISCHARGE_7D	729	938	0.7531	0.7452	OK	

gap:CO PD_SPI ROMET RY	762	905	0.6220	0.5934	OK	
gap:DIA B_A1C_ TEST	752	915	0.2021	0.1945	OK

gap:DIA B_EYE_ EXAM	754	913	0.2812	0.3001	OK	
gap:DIA B_NEP HRO_S CREEN	726	941	0.3154	0.2859	OK	
gap:HT N_PCP_ FOLLO WUP	759	908	0.2516	0.2599	OK	

Follow-up: window 365 days; median available follow-up 387 days; 85.7% of rows have the full window (the rest are censored at the data cut).

Secondary cohort: CKD_NEPHROLOGY_VISIT (research-computed labels, not headline)

InComm's rules engine never produced CKD rows (ConditionCode 'CKD' vs 'CHRONIC_KIDNEY_DISEASE'), so these labels are research-computed. Reported separately; never mixed into the headline.

Metric	Value
Rows	1650
Treated / control	754 / 896
Treated closure rate	0.3156
Control closure rate	0.3516
ATE (SE)	-0.056948897346454065 (0.05312725224263574)

Why diabetes looked untreated-empty (member-broadcast T)

M4 rolled sim rewards to MemberId and copied T onto every gap. A closed BH reward then marked still-open diabetes gaps as treated.

Care Gap Code	N	Treated Rows	Control Rows	Treated Closure Rate	Control Closure Rate	Untreated Arm Empty
BH_POST_DISCHARGE_7D	1667	1248	419	1.0000	0	No
COPD_SPIROMETRY	1667	1011	656	1.0000	0	No
DIAB_A1C_TEST	1667	1667	0	0.1980	—	Yes
DIAB_BLOOD_SUGAR	1667	1667	0	0.3185	—	Yes
DIAB_EYE_EXAM	1667	1667	0	0.2915	—	Yes
DIAB_NEPHROSCREEN	1667	1667	0	0.2987	—	Yes
HTN_CP_FOLLOWUP	1667	622	1045	1.0000	0	No

Identification autopsy

- IncentiveRewards 3rd-party feed is not implemented (InComm 2026-07-20 Q4). Track R uses a research-generated IncentiveRewards-shaped ledger on real members/gaps/amounts. It is not InComm-issued; Milestone 7 may use it only as labeled research input.
- Live QA: IsRewardEligible iff Status='Closed' (0 violations). HAR cases / sim rows are generated for those closed gaps (CaseSubtype = care_gap_code). Gap-level Track S T equals Y on catalog gaps.
- Member-broadcast T (M4 lifetime sim count) copies any reward onto every gap for that member. Diabetes untreated-empty is that artifact, not a missing arm.
- ISS-008: clinical claims ServiceFrom <= 2026-06-23; HAR CreatedAtUtc >= 2026-06-25. Case time is after every claim on this extract — reverse causation is structural for HAR. The Track R mock reconstructs outreach lag from gap tenure.
- Track R mock assignment is Bernoulli among gaps still open at t0. Historical closure was not caused by mock T; identified CATE here is a pipeline/negative-control result, not partner-facing lift.
